BIO

Standing by my work is what I do every day. I am very proud of what I am able to achieve when I set my mind to it. After spending my day as a web developer, I enjoy working on passion projects such as: learning new technologies, reading articles to stay up to date on best coding practices, and reaching out to other developers in the field. I have a deep passion for software development.

TECHNICAL EXPERIENCE

ActionVFX, Johnson City — *Front end web developer*

February 2020 - PRESENT

Develop and maintain all front end code for actionvfx.com while developing the front end of a new site set to launch late this year (creatorvault.com). I also take on as many server-side tickets as possible to eventually become a Full-Stack developer. All progress is tracked through Agile methodology.

Bros Management INC., Knoxville — *IT Support Manager*

February 2018 - February 2020

Provide technical support for nine McDoanld's Restaurant locations and in an office environment. Oversee a team of technicians located at different sites for best accessibility.

PORTFOLIO

ActionVFX.com — *Foundation CSS, SASS, Jquery, React, ERB, Ruby on Rails, and Postgresql*

[View Project](#)

CreatorVault.com — *Foundation CSS, SASS, React, Typescript, Redux, Next.JS, Jest, Ruby on Rails backend API that provides content and products.*
